

patientACCESS® is a program that provides patients and caregivers with low- or no-cost access to medical research articles. The American Association for Cancer Research (AACR) is pleased to participate in this initiative and offers caregivers, patients, and their family members free access to the most important new journal articles about cancer research and treatments through the AACR's online journal content.

How It Works

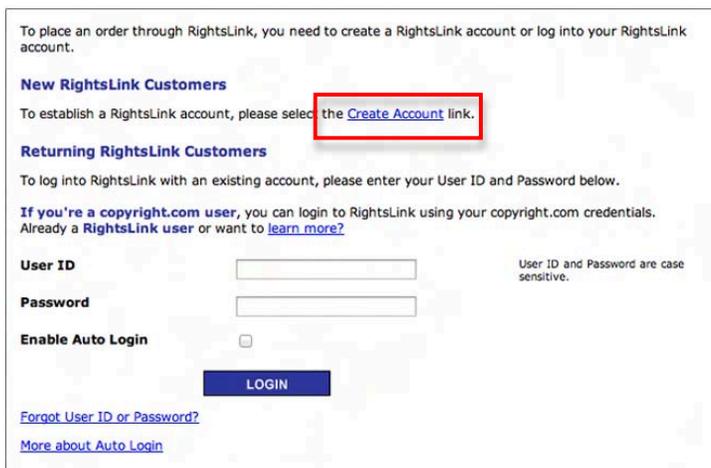

If a patient or a caregiver discovers an abstract of an article in one of the AACR journals and wishes to read the full text of the article selected, he or she can click on the "full text" button appearing on the webpage of the article, which will lead to a log-in page.

If you are a patient or caregiver with an interest in researching a particular type of cancer or its treatment, follow the steps listed below to receive full-text versions of the articles of interest:

1. Click on the **patientACCESS** link directly below the journal's sign in box. This will direct you to a Copyright Clearance Center RightsLink page.

2. On the Copyright Clearance Center RightsLink® page, click on the **Continue** button at the bottom.

3. Click on the **Create Account** link. You can use this account to access articles from all of AACR's journals.

- Step 1:** Type your e-mail address as your User ID and create your password.
